offices in NZ via Video Conference Link**

Children and their families suffer unnecessarily with bowel and bladder issues. These parent education workshops are provided by a qualified, experienced Specialist Paediatric Continence Advisor.

The Advancewellness Centre 's philosophy is that it takes a village to raise a child and these parent education workshops are aimed at provide basic continence education and information.

Julie Jordan-Ely

Specialist Paediatric Continence Advisor

C.E.O. and Founder of the Advancewellness Centre - Melbourne

Paediatric Continence Association of Australia will continue to provide advice, support, education and advocacy for children and young people who suffer from incontinence, and their families. Camp Snedley, as always, will give young people a fun and supportive environment to reinforce the awareness that their condition can be managed, and that others are in exactly the same situation. The Advancewellness Centre has a multidisciplinary team delivering an integrated model of care which includes paediatric continence assessment and management, specialist services for Slow Transit Constipation in adults and children, specialist counselling services, continence education together with a range of continence products, portable Interferential Therapy Machines, and a wide range of chronic illness resources. Our team includes a specialist paediatric continence advisor, family support worker, counsellors, administration staff and volunteer team.
